

# JOSHUA ISRAEL MUTHU S

Senior Backend Engineer | Technical Lead | Java & Python | Cloud Modernization

Chennai, India | +91 9003497291 | joshuamuthumsm@gmail.com | linkedin.com/in/joshua-s-5b9854109

## PROFESSIONAL SUMMARY

Senior Backend Engineer and Technical Lead with 7+ years delivering enterprise backend platforms across Financial Services, Healthcare, Airline Loyalty, and SaaS. Deep expertise in Java 17, Spring Boot, microservices, PostgreSQL, Redis, Kafka, AWS, Kubernetes, Terraform, and CI/CD modernization, with growing hands-on experience in Python ETL pipelines (Airflow, BigQuery). Track record of leading engineering teams, driving cloud transformation, and improving system performance and reliability through hands-on architecture and optimization work — not just process oversight.

## CAREER HIGHLIGHTS

- 7+ years of backend engineering across fintech, healthcare, airline loyalty, and SaaS domains
- Cut API latency by 60% on a healthcare claims platform through targeted caching and query optimization
- Automated CI/CD migration of 400+ repositories (Jenkins → GitHub Actions) using a custom Python migration script
- Built Python/Airflow ETL pipelines transforming ads data into BigQuery for a major client, enabling downstream reporting and analytics
- Built backend services processing 100,000+ ANSI 835 healthcare claims per day
- Led and mentored engineering teams of up to 10, covering architecture reviews, sprint planning, and production ops

## CORE COMPETENCIES

Java 17 • Spring Boot • Microservices • REST APIs • Distributed Systems • AWS (ECS, EC2) • Kubernetes • Docker • Terraform • PostgreSQL • Oracle SQL • Redis • Kafka • GitHub Actions • Jenkins • Python (ETL, Airflow, Automation) • BigQuery • Grafana • Prometheus • Splunk

## PROFESSIONAL EXPERIENCE

### Senior Application Developer / Technical Lead — IBM Consulting

Oct 2025 – Present

- Building and maintaining Python-based Airflow DAGs on the Lumi engagement (Amex client) to run daily and monthly ETL batches, transforming ads data and loading it into BigQuery for downstream reporting and analytics teams
- Led enterprise modernization initiatives migrating multiple Java applications from JBoss to Apache Tomcat
- Designed and built a custom Python automation script to migrate ~400 repositories from Jenkins to GitHub Actions, standardizing CI/CD pipelines and removing manual conversion effort across teams
- Led a 10-member engineering team across sprint planning, interviews, technical design reviews, mentoring, performance reviews, production support, and release execution
- Partnered with development, QA, infrastructure, and release teams to deliver production migrations with minimal downtime
- Recipient of the IBM Quarterly Cash Award

### Technical Lead — GAVS Technologies

Aug 2023 – Oct 2025

- Designed backend microservices for a healthcare platform processing ~100,000 ANSI 835 claims daily
- Improved API latency by 60% by introducing Redis caching for high-frequency read paths and re-tuning slow PostgreSQL queries (indexing and query restructuring)
- Built cloud-native services on AWS ECS and EC2 using Java 17, Spring Boot, PostgreSQL, Redis, and Terraform
- Implemented PostgreSQL partitioning and archival automation to improve scalability and operational efficiency
- Led six engineers while driving engineering standards and technical mentoring

### Senior Software Engineer — *IBS Software*

2022 – 2023

- Developed backend services and PostgreSQL procedures for airline loyalty systems
- Improved messaging reliability using Kafka and production performance tuning

### Member Technical Staff — *Zoho Corporation*

2021 – 2022

- Developed customer-facing APIs and improved platform scalability and performance

### Project Engineer — *Wipro*

2019 – 2021

- Owned mission-critical enterprise applications and developed OAuth2-secured APIs from scratch

## TECHNICAL SKILLS

---

**Languages:** Java 17, SQL, Python (ETL, Airflow, Automation), Perl

**Frameworks:** Spring Boot, Spring MVC, Hibernate, Microservices

**Cloud:** AWS, Azure, GCP

**Containers:** Docker, Kubernetes

**Databases:** PostgreSQL, Oracle SQL, MySQL, BigQuery

**DevOps:** GitHub Actions, Jenkins, Terraform, Maven, Gradle

**Observability:** Grafana, Prometheus, Splunk

## EDUCATION

---

- M.Tech (AI & ML), BITS Pilani (WILP) — In Progress
- Bachelor of Engineering in Computer Science

## CERTIFICATIONS

---

- IBM Generative & Agentic AI Architect
- IBM Generative & Agentic AI Developer
- Application Modernization with watsonx — IBM
- Digital Product Engineering Essentials — IBM

## AWARDS

---

- IBM Quarterly Cash Award
- GAVS Star Performer
- Zoho 'The Ideator' Award
- Wipro Best Employee (2×)
- IBS Quality Team Member Award
